

# The Ultimate Buyer's Guide

Our ultimate guide  
to choosing the  
perfect countertop.

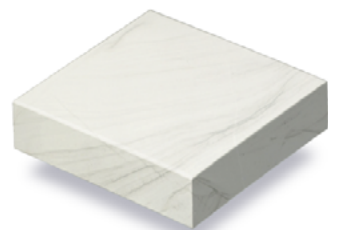

Custom Countertop  
designed to order,  
material, fabrication  
& installation

[mcgranitecountertops.com](https://mcgranitecountertops.com)

The largest selection  
of countertops in  
the states of GA, NC & TN

# Customize Your Countertop

## Step 1 – Choose material

Select your perfect countertop from our wide range of materials and colors. We're sure to have the unique combination not only to match your design style, but also to perfectly match your lifestyle.

## Step 2 – Choose any edge & sink

Our Project Managers will help you determine the right edge to accent your unique style and the correct sink to get the most functionality for your needs.

## Step 3 – Book an in-home measurement

One of our fully vetted and insured template technicians will come to your home and measure for your countertops, ensuring the perfect, custom fit.

## Step 4 – Schedule an Installation

Once the material is custom fabricated to your home's exact measurements our installers will return to your home to install your custom countertops and deliver the kitchen of your dreams

## Our Mission

To offer the highest quality exotic countertops and installation services in the southeast.

## Our Vision

To be the number one choice for high-end countertops in the entire southeast.

# Measuring For Your Countertop

To get an accurate estimate for your new countertops, take a moment to measure your existing space before meeting with an MC Granite Project Manager. Follow these simple steps and use the graph paper on the back to sketch your kitchen countertop layout and record measurements.

## Measure your countertop

- Measure the length and width of each countertop section in inches (see examples on the left). Round all numbers to the nearest half-inch.
- Record your measurements in the provided table on the back.
- Multiply the length by the width for each section to get the area in square inches.
- Total the area for each section to determine the overall square inches for your countertops.
- Divide the total square inch area by 144 to get the total square footage.

**Note:** If you prefer, you can simply record the lengths and widths, and a Project Manager at MC Granite will handle the calculations.

## Draw your kitchen

Use the graph paper on the back to sketch your countertop layout. Each square on the paper represents 1' x 1'. Identify: **finished edges** (use a "0" for finished edges), **walls**, **areas for backsplashes** (use "BS" to indicate backsplashes), **cooktops**, **free-standing and drop-in ranges**, **dishwasher**, **refrigerator**, **sink**.

## Bring Your Worksheet To MC Granite

Tear along the perforated edge on the left and take your completed worksheet to any MC Granite Showroom. This worksheet is for estimation only and not a contract. Actual measurements may vary. Your countertop's total cost may differ from the estimated cost here. If you choose MC Granite, a professional Template Technician will take precise measurements before fabrication and installation.

This estimate is non-binding and subject to change. Your Project Manager will calculate your exact price after professional measurements. Minimum order quantities may apply. The estimate is for general information and illustration only. Use the results as a guide, not a guarantee, applicable to any specific circumstances. Do not rely on or use it as such.

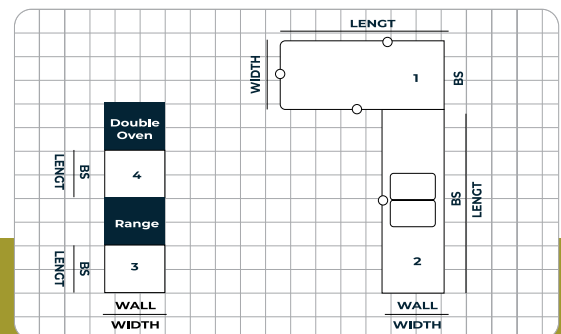

### EXAMPLE

COUNTERTOP MEASUREMENTS					
	LENGTH		WIDTH		SQ. INCHES
1.	72"	x	36"	=	2,592
2.	96"	x	25.5"	=	2,448
3.	24"	x	25.5"	=	612
4.	24"	x	25.5"	=	612
Total				=	6,264

### EXAMPLE

CONVERT TO SQUARE FEET			
Total Square Inches			6,264
Divide by 144	÷		144
Total Square Feet	=		43.5

Total Square Inches		
Divide by 144	÷	144
<hr/>		
Total Square Feet	=	

## Step 1 – Choosing your material

MC Granite offers an extensive range of materials, featuring a vast selection of colors and patterns for you to explore. Beyond aesthetics, consider the wear and tear your countertops will face, your maintenance commitment, and your budget. Our dedicated MC Granite Project Managers are here to guide you in choosing the perfect countertop that not only aligns with your design preferences but seamlessly integrates with your lifestyle

### Marble

Marble countertops are timeless and luxurious, showcasing subtle to dramatic veining that ensures a unique touch to your home. Each slab is one-of-a-kind. This natural material withstands heat and develops a beautiful patina over time.

### Quartz

Quartz is a nonporous surface that prevents unwelcome germs, bacteria and mildew. Easy to maintain and clean this lustrous surface does not require sealing or polishing. Quartz is scratch, heat and stain resistant.

### Granite

Granite has a rich beauty that few other countertop materials can match. It is a natural product with a timeless appeal. Durable, easy to maintain and clean. Granite is a very hard natural stone that is scratch, heat and stain resistant when properly sealed.

### Quartzite

Quartzite, a natural top-tier surface, boasts exceptional durability, surpassing granite in hardness. Resistant to heat, chemicals, and environmental wear, it's the ideal choice for long-lasting, beautiful countertops.

### Soapstone

Soapstone, a timeless natural stone, is renowned for its warmth as it suits various styles from country kitchens to modern settings, showcasing exceptional design versatility.

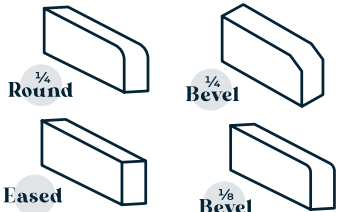

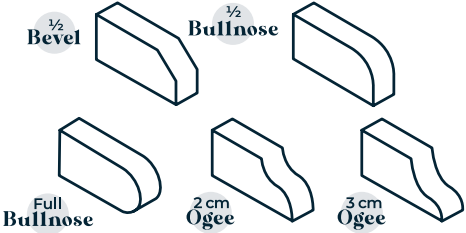

### Porcelain

Porcelain countertops, easy to clean and non-porous, resist stains without the need for sealing. Quality porcelain is scratchproof, heatproof, and highly durable

## Step 2 – Choose your edge

The edge of a countertop can be the perfect accent to tie your design together. With a wide range of edge profiles we offer, you are going to find the perfect one for you.

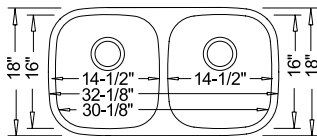

FREE EDGES	UPGRADE EDGES PROFILES	MITERED EDGE
		
		LAMINATION EDGE
		

Edge images should be used for reference only as actual shape, size, and availability will vary by market. Please see your MC Granite Project Manager for more information.

## Choose your sink

We offer a wide variety of sink options to accommodate your space and lifestyle. Our Project Managers can help you find the perfect sink and finishing touches for your project.

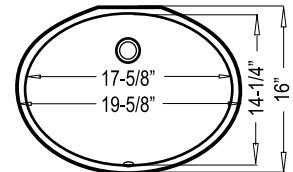

**50/50**

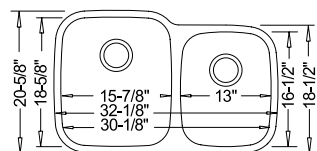

**Farmhouse Sink (Apron)**  
MARSHALL

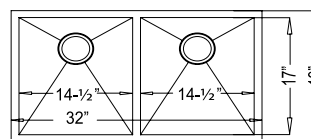

**Porcelain Sink**  
LOTUS

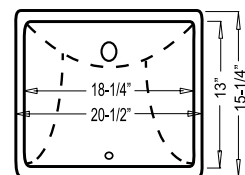

**60/40**

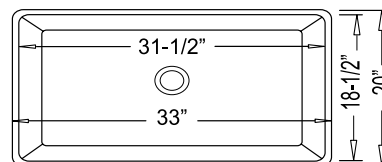

**50/50HA120 Zero Edge**  
BOWIE

**Porcelain Sink**  
SCOOP

**Porcelain Farmhouse Apron Sink**  
SINGULATION

## Step 3 & 4 – Template & Installation

### Schedule a template

This buying guide can assist you in measuring your countertops to provide us with the necessary information to calculate a personalized estimate just for you.

However, if you would like, you can have your countertop professionally measured by one of our fully vetted, Certificated Template Technicians. This will ensure the measurements are correct, improving the accuracy of your estimate. Our Project Managers will be more than happy to provide you with the details on how to schedule your template.

### Installation

You've put a lot of thought into the project countertop for your home and you need someone just as focused on the details to make sure your vision becomes a reality.

Our experienced Fabricators will fabricate your countertops to the exact specifications of your home and vision, then our certified Installers will go to your home to professionally install your countertops.
